-    R&D
-    Sales & Customer Service

For our office in Barcelona we are recruiting a **Senior System Engineer**. Working with the IT Director, you will collaborate to maintain a high level of quality and to develop new features within the Emailing Platform.

You will be in charge of:

- The technical viability and performance of the platform
- Maintaining the technical backend of our delivery platform
- Administration of the server farm collaborating with our Senior system Administrator
- Designing and optimizing the database
- Optimizing the Emailing platform
- Install and setup new Emailing platform environment
- You will be required to be on on-call sometimes

Your profile:

- IT Degree, with at least 3 years of experience
- High skills of Linux (Debian) and SHELL
- High knowledge of PHP
- High Knowledge in email servers and web
- Fluent in English
- French or Spanish will be a plus
- Team work spirit
- Working knowledge of Email Service Provider applications will be a plus
- Systems-oriented thinker with good communications skills
- Be able to work under stress

Our job offer:

- Full-time, permanent contract, based in Barcelona
- Attractive salary + Bonus for on-call whenever is asked
- Social Benefits: private health insurance + ticket restaurant
- High working autonomy
- You will be part of a fast-growing company with many opportunities constantly created and a dynamic, result-oriented, no-nonsense & young culture.
    Long term careers are not only a possibility; they are the key to our success!
